About Yuzet®

We are a manufacturer and global distributor of high quality construction & landscaping products.

Our key lines include Groundcover, Geotextiles, Scaffold Netting, Insulation Foils, and XT Tarpaulins. We are also excited this year to become the UK Distributor of Soppec Marking Sprays & Technical Sprays widely used in the Construction & Civil Engineering Sectors. These marking sprays are the most environmentally friendly produced aerosol in the world.

All our products are available in bulk for construction sites and other large projects , but we also offer them in smaller quantities for retail. So whether you require products by the pallet or single items for small projects, we have you covered.

Reinforced Tarpaulins

The edges of Yuzet® tarpaulins are folded over and then fusion welded which creates extremely strong seams and a 100% waterproof fabric. The eyelets are ultrasonically welded, so there is no damage to the fabric and even under strain the material around the eyelets will not tear or break.

Yuzet® tarpaulins offer UV protection for the entire lifespan of the product as UV filters and stabilisers are integrated directly into the material. This means that the tarpaulins can be exposed to harsh weather conditions and still be UV-resistant in bright sunshine.

Specs

Conforms to DIN ES ISO 4892-3
(outdoor weathering)

100% Waterproof

Fusion-welded edges

Ultrasonically welded eyelets

Weight: 70gsm or 110gsm

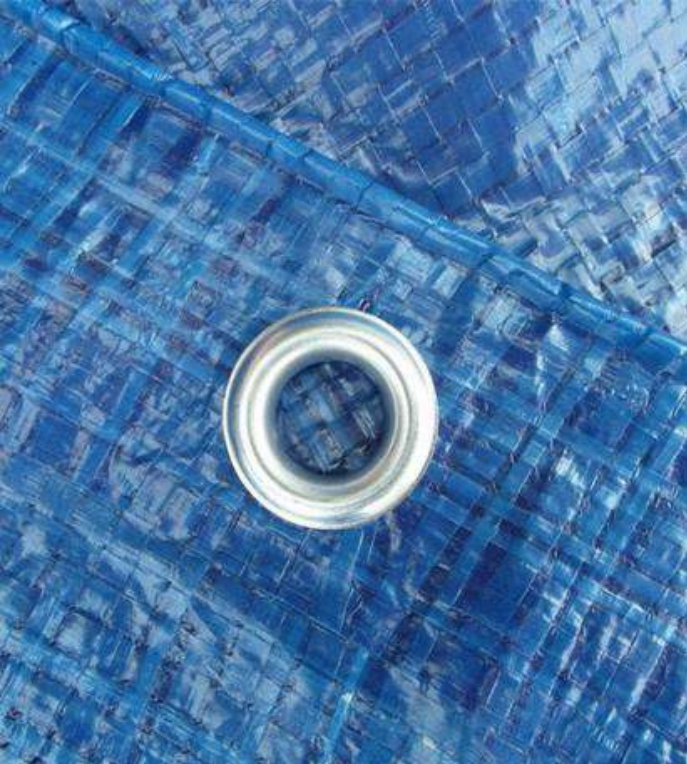

Length: from 1m to 12m

Colours: Clear, Silver Grey,
Camouflage Green, Winter

Economy Tarpaulins

Our economy tarpaulins have 12mm aluminium eyelets at metre intervals in rope reinforced hems. They remain flexible even in sub-zero temperatures and come with UV protection. They are rot and shrink proof and also 100% waterproof which makes them ideal for a wide range of applications.

Available in a wide range of sizes, Yuzet® tarpaulins offer consumers a complete and cost effective temporary covering solution.

We are happy to produce custom sizes upon request as well.

Specs

100% Waterproof

UV-Protection

Re-inforced hems

Aluminium eyelets

Weight: 70gsm

Length: from 1m to 12m

Colours: Green, Blue

Debris Netting

Yuzet® netting consists of a fine vertical mesh construction that adheres to European standards. Nets weigh 70gsm, are made from high density polyethylene and come with eyelets at the top and bottom to allow easy installation. Wider nets also have a row of eyelets in the middle.

Our Yuzet® netting can be used as scaffold netting or to create safety barriers between construction sites and public space. They also make great garden nets and they reduce sunlight by up to 30% so they can also be used in hotter climates as shade covers.

Specs

Eyelets along both edges and through the centre of wider widths

Weight: 70gsm

Width: 1m, 2m, 3m

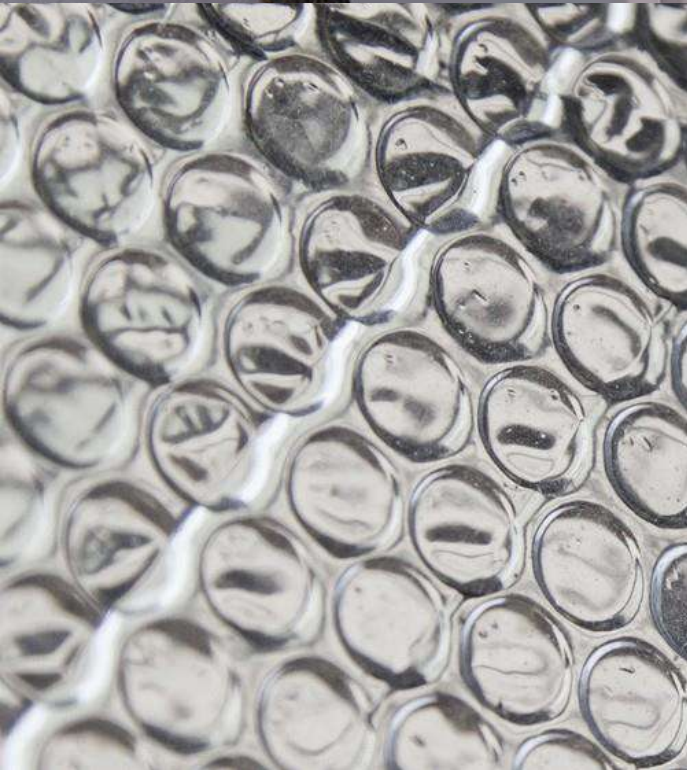

Length: 50m or 100m

Colours: Black, Green

Foil Insulation

Yuzet® foils are one of the UK's bestselling foil ranges with many different insulation purposes. All foils are non-conductive and they are easy and quick to use and install.

We offer three kinds of foil: Radiator Foil, Triplex Laminate and Pipe Wrap.

Radiator Foil consists of one layer of aluminium foil and one layer of laminated bubble, while the Triplex Laminate has a centre layer of bubble foil that has been lined with aluminium foil on both sides.

Yuzet Pipe Wrap keeps pipes warm and reduces the risk of leaks while acting as a noise barrier.

Specs

Radiator Foil:

One layer of aluminium and one layer of foam.

Triplex Laminate:

Centre Layer of bubble foil lined with aluminium foil on both sides.

Non-conductive.

R-Value: 0.88m²K/W

Pipe Wrap:

7.5m x 8cm

Thickness: 3mm

Geotextiles

Our woven geotextiles are produced from polypropylene and in compliance with Regulation (EU) No 305/2011 of the European Parliament and of the Council of 9th March 2011 (the construction products regulation or CPR).

They consist of tightly woven threads, are extremely durable and able to withstand a lot of strain and pressure. The material is usually placed at the tension surface to strengthen the soil which in turn increases the longevity of roads for example. The material is permeable and lets water and air pass through, but stops mud or soil from seeping through and also prevents weed growth.

Specs

Certifications: EN 13249:2016, EN13250:2016, EN13251:2016, EN13252:2016, EN13253:2016, EN13254:2016, EN13255:2016, EN13257:2016, EN13265:2016

Ground Cover

Our Yuzet® Ground Cover Membranes consist of tightly woven polypropylene threads and are UV-resistant which guarantees a long product lifespan. The membranes are premeable for water and air, but reliably block weed growth without the need for chemicals. Our ground cover membranes have planting lines which makes them especially suitable for use in gardens and allotments as they facilitate planting in straight lines.

We produce ground cover on an industrial scale and it comes in various different sizes. We are happy to produce custom sizes and weights upon request.

Specs

Woven Polypropylene

UV Stabilisation

Planting Lines

Weight: 70gsm, 80gsm, 100gsm, 105gsm, 115gsm, 130gsm

Width: 1m, 1.5m, 2m, 3m, 4m, 5m

Length: 1m, 25m, 50m, 100m, 200m

Garden Netting

Plants, fruits and vegetable crops have to be protected effectively from pests, insects, birds and bad weather. We've been producing different nets for many years and we are currently offering two different kinds of Windbreak or Shade Netting, Pea & Bean Netting, Insect Netting and two different kinds of Bird Netting.

All nets come in a variety of sizes and are made from high-density polyethylene. They come in green or black and we are happy to produce custom sizes as well.

Specs

Windbreak/Shade Netting:

30% & 50% Protection
High-density Polyethylene

Pea & Bean Netting:

Weight: 8.5gsm
Mesh: 20cm x 20cm
High-density Polyethylene

Bird Netting:

Extruded or Monofilament
Mesh: 18mm x 18mm

Insect Netting:

Weight: 70gsm
Mesh: 0.7mm x 0.7mm

Garden Fleece

Yuzet® Horticultural Plant Protection Fleece is an environmentally-friendly solution for protecting crops and plants from frost, wind, sun and insects without the need for harmful chemicals.

Covering plants with fleece creates a microclimate and adds a layer of insulation around them which ensures that seedlings keep warm in frosty and windy conditions. In summer, the material protects plants from insects.

The material is very strong yet light-weight and porous, and allows water, air and light to pass through the fabric.

Specs

Polypropylene

Weight: 17gsm, 35gsm

Width: 1.5m, 2m, 3m, 4m, 5m

Length: 10m, 15m, 50m

Colour: White

customerservice@bestporteurope.co.uk

Plant Covers

Yuzet® Fleece Plant Covers offer effective protection from frost, wind and snow. At 35gsm, the fleece will protect plants while being light enough to not cause any damage to leaves or buds.

These high-quality fleeces are made from strong polypropylene and let water, air and light through. They come with a drawstring which makes it easy to securely fasten the covers around the base of plants or pots. This creates a microclimate and helps to keep a steady temperature even in colder conditions.

Specs

Polypropylene

Strings for securing covers

Weight: 35gsm

Sizes: 60cm x 85cm

80cm x 105cm

120cm x 185cm

140cm x 200cm

Colour: Green

customerservice@bestporteurope.co.uk

+44 (0)1382 770599

Sandbags

Yuzet® offer premium Polypropylene or Hessian sandbags which are a cost effective solution to protect homes or workplaces from floods and water damage. Polypropylene bags have a longer lifespan while Hessian bags are more environmentally friendly.

Each bag holds about 25kg and an average house will need about 12 filled sandbags per door in order to provide an effective flood defence barrier.

Yuzet® Sand Bags can also be used as weights to hold down garden furniture, road signs, netting, covers, tarpaulins, tents and other garden structures.

Specs

Length full: 50cm

Length empty: 78cm

Tiestring

Woven Polypropylene:

Colours: Black, Green, Beige, White

UV Resistant

Capacity: 25kg max

Premium Garden Covers

The edges of Yuzet® Premium Garden Covers are folded over and then fusion welded which creates extremely strong seams and a 100% waterproof fabric. It also means that even under strain the material around the eyelets will not tear or break. The covers come with cord ties to securely fasten them around furniture, mowers or BBQs.

Yuzet® premium garden covers offer UV protection for the entire lifespan of the product as UV filters and stabilisers are integrated directly into the material. This means that the covers can be exposed to harsh weather conditions and still be UV-resistant in bright sunshine.

Specs

Conforms to DIN ES ISO 4892-3
(outdoor weathering)

100% Waterproof

Fusion-welded edges

Metal eyelets

Cord Ties

Shapes: Tables, BBQs, Lawn
Mowers, Sun Loungers, etc

Colours: Green, Blue

+44 (0)1382 770599

Automotive Covers

The edges of Yuzet® Automotive Covers are folded over and then fusion welded which creates extremely strong seams and a 100% waterproof fabric. The covers come with cord ties to securely fasten them around cars, lawn mowers or motorbikes.

Yuzet® automotive covers offer UV protection for the entire lifespan of the product as UV filters and stabilisers are integrated directly into the material. This means that the covers can be exposed to harsh weather conditions repeatedly and you don't need to worry about moisture getting to your car or motorbike.

Specs

Conforms to DIN ES ISO 4892-3
(outdoor weathering)

100% Waterproof

Fusion-welded edges

Waterproof Tanking Membrane

Our Waterproof Tanking Membrane has been designed to prevent damage from water leaks. Suitable for use under floors, behind walls, in bathrooms and in outside areas, the 100% waterproof fabric catches leaking water and prevents it from seeping into the underlying structure.

The material is very flexible, very easy to use and install and once in place it requires no further maintenance.

Specs

100% Waterproof

Moisture Barrier

High puncture and tear resistance

Resistant to alkalescent

Flexible and user friendly
